

# Sustainable packaging

## Paperbased Flowpacks

Discover the latest development of sustainable packaging: The fully paper based flowpacks are an ideal alternative to conventional packagings. Profit from the reduced use of packaging material by combining the properties of the classic two-layer packagings in only one single layer.

- ◆ Reduced material consumption thanks to single-layer packaging
- ◆ Available for all formats from 30 – 100g
- ◆ Recyclable in the paper waste stream
- ◆ High flex-crack resistance
- ◆ Top sealing properties (with cold seal)
- ◆ Inner layer made of wax
- ◆ Digital, flexo or gravure printing

Thanks to our state-of-the-art packaging machines, the flowpacks are packed at high speed and largely automated, enabling to offer your customers an attractive range of products.
